## Sales & profit by year

## Monthly sales and profit

## Seasonality: sales by month

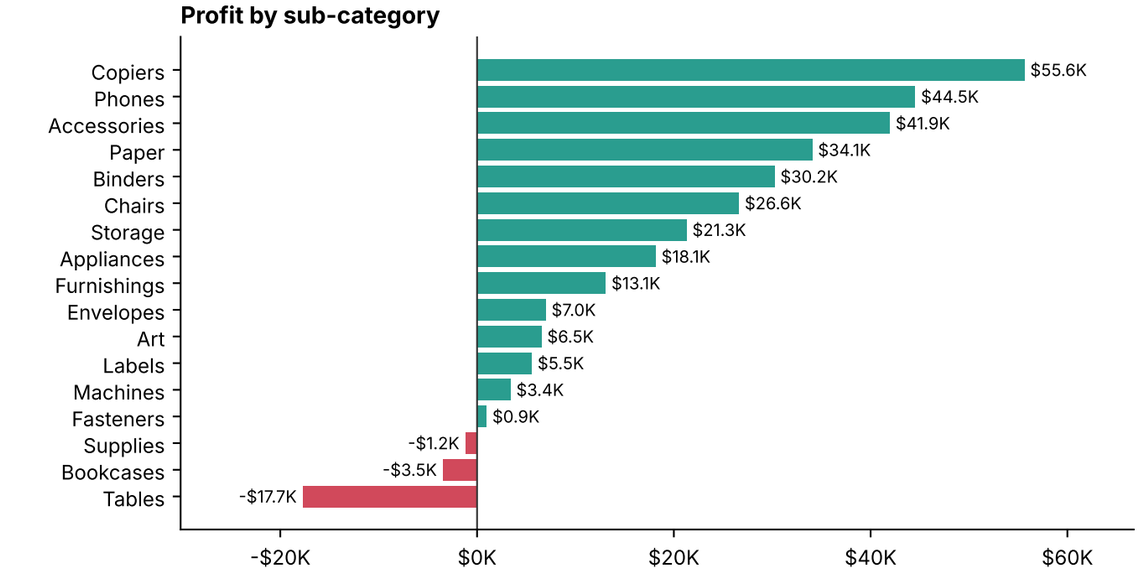

### What this means

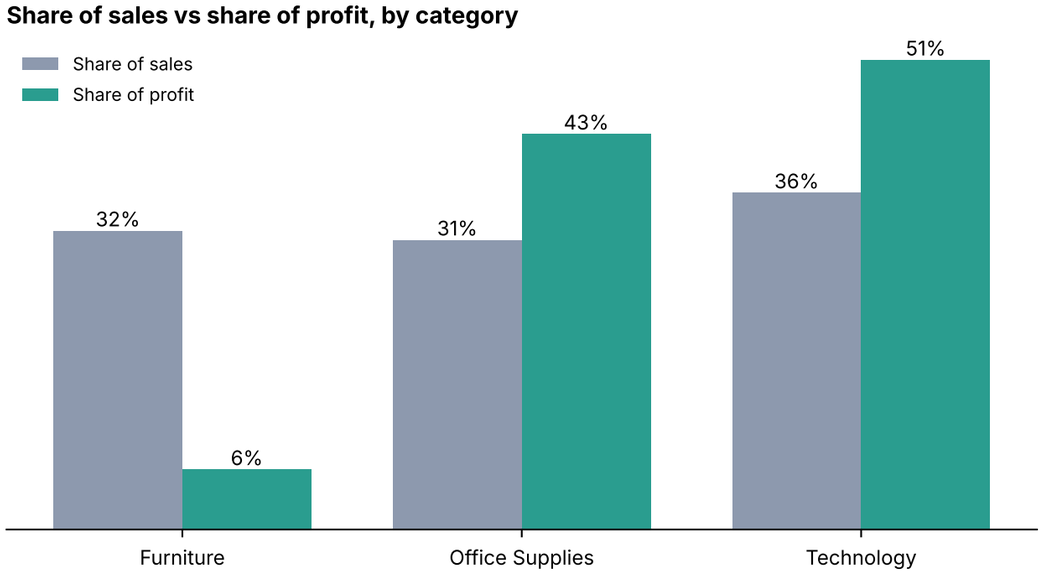

- Sales reached $733K in 2017 (+20.4%), after +29.5% in 2016.
- Profit grew slower than sales in 2017, so margin fell to 12.7%.
- Sep, Nov and Dec generate 43% of annual sales; Jan-Feb are the weakest months.
- Action: plan stock and promotions around Sep-Dec, and protect margin as volume grows.

# Products & Categories

Furniture is 32% of sales but only 6% of profit; Tables alone lose $17.7K

Source: Sample Superstore dataset (Kaggle), orders Jan 2014 - Dec 2017 | FUTURE_DS_01 | Tools: Python (pandas, matplotlib)

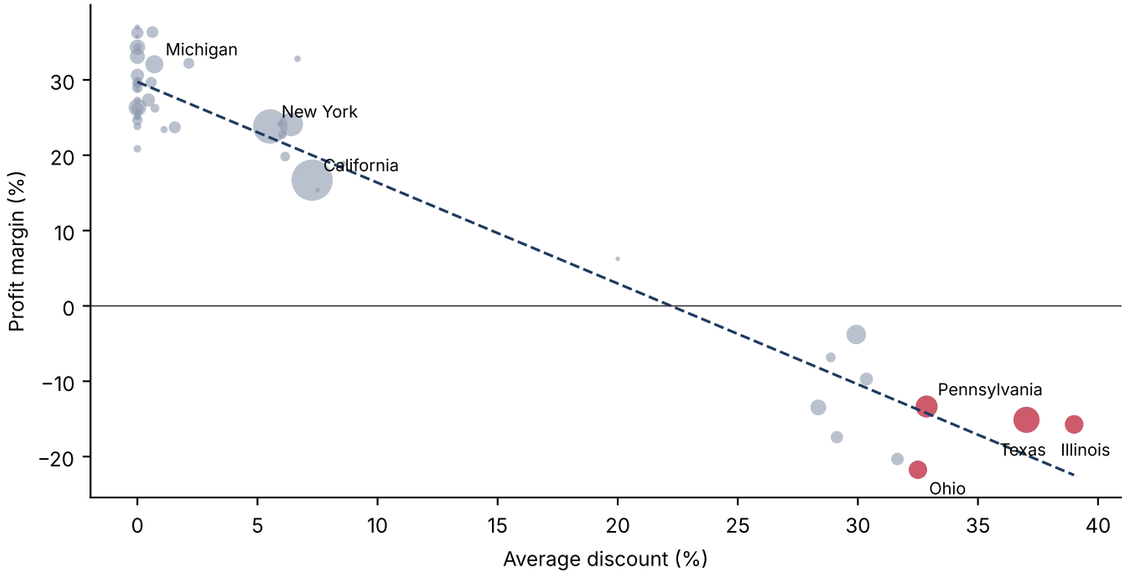

# Regions & Discounts

Discounts above 20% lose $135K in total - and the four worst states discount the most

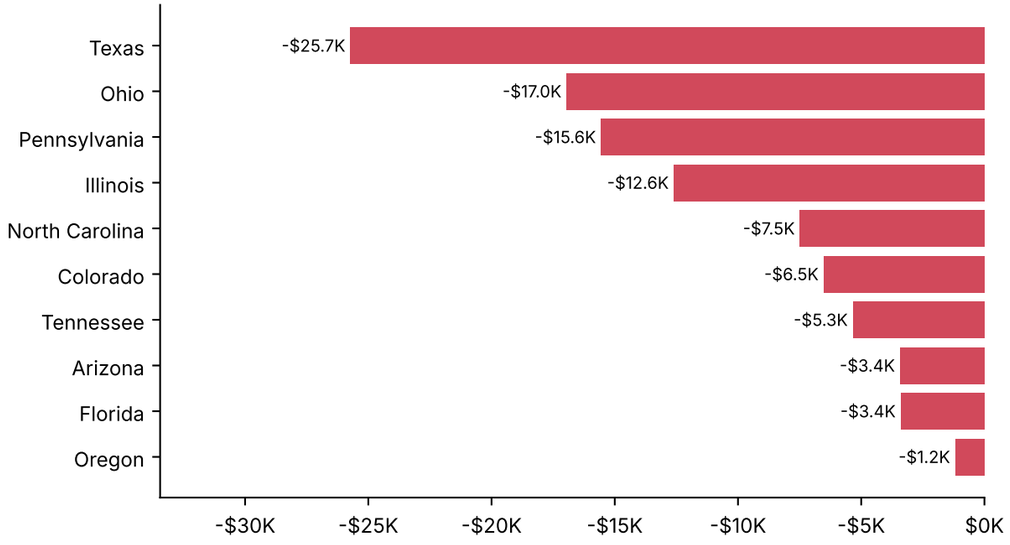

### Profit by discount band

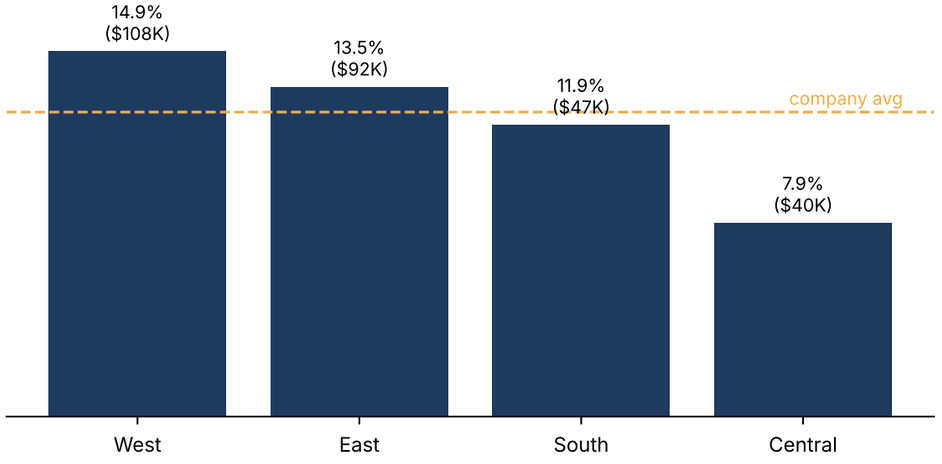

### States: higher discounts, lower margin (r = -0.96)

### 10 states with the largest losses

### Profit margin by region (profit in brackets)
